Subject: Concurrence on the creation of New Operable Unit 1-11

The IDEQ concurs with the creation of a new OU 1-11 for new sites at TAN, to initially include TAN-616 and IET-12. However, please provide more information in regards to how the "investigation and decision document can be conducted, if necessary, under a separate OU, ...". Also, the Request for Concurrence letter was dated December 1, 2000 and in it there was a request for concurrence by December 11. However, we did not receive the letter here at the State until December 18. Thanks,

Clyde
